

Save and find a photo

Neighbor Tech - a ProSystems program - Keep this handy

For: Any phone or tablet

Keep the photos people send you, and find them again later.

Step by step

1. To save a photo someone texted you, press and hold on the picture.

A little menu appears after a moment.

2. Tap 'Save', or the download arrow.

The photo is copied into your photo collection.

3. To find your photos, open the Photos app, or Gallery.

Photos (iPhone) looks like a colorful flower; Gallery or Google Photos (Android) is similar.

4. Scroll to see your pictures, and tap one to see it big.

Your newest pictures are usually at the bottom.

5. To send one back, tap the photo, then tap the share icon.

The share icon is a box with an arrow pointing up. Pick a person or app to send it to.

Good to know

- A 'screenshot' also saves to your photos - press the side and volume-up buttons together.
 - Photos don't run out easily, so it's fine to keep the ones you love.
-

If you get stuck

Can't find a photo you saved? It's almost always in the Photos or Gallery app. Call us and we'll find it together.

Questions? Call us.

There's no such thing as a silly question. Call or text us anytime and we'll walk you through it.
